- 469 Duplicate of last. Same condition.

The statement sometimes made that these bright red Virginia coppers are restrikes of a recent issue, is simply preposterous. A small bag filled with them was discovered years ago in Richmond, Va. They fell into the hands of that well known numismatist, the late Col. Cohen, of Baltimore, through whose agency they were placed in the hands of dealers and collectors.

The details of the tools and the of collectors for the beautiful and rare pattern coins of the U. S. Mint must always remain an unfulfilled wish, because the number struck is too limited to find representation in more than a few cabinets. Among these the 2 cents of Washington and the 5 with busts of Lincoln and Washington represent the only occasion made to introduce the effigies of our Presidents upon the National coinage. They are really rare and will soon command much larger prices than heretofore.
